

Cushion Choices

Seat Cushion Choices

Comfort

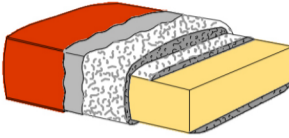

This cushion uses a thick high resiliency/high density Qualux foam core, wrapped with a continuous layer of dacron fiber that is placed on the top, across the front and bottom of the core, all encased in fabric ticking. The make up of this cushion provides a smooth look, a comfortable supportive feel and also reduces "comfort wrinkles" in the fabric.

**Care -- Rotate cushions periodically**

Firmness Levels:

- Comfort Soft (2.55 Density - 16 lbs. Compression/ILD)
- \*Comfort Medium (2.05 Density - 21 lbs. Compression/ILD)
- Comfort Firm (2.55 - 27 lbs. Compression/ILD)
- Comfort Extra Firm (2.55 - 31 lbs. Compression/ILD)

\*Denotes the standard cushion for Comfort cushions

Plush

This cushion series provides a similar level of firmness to the Comfort Cushion. It adds a little more comfort because of the fiber wraps and has more crown to the cushion. Some puddling should be expected. Then it is wrapped in a down proof ticking.

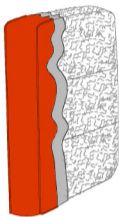

**Care -- Fluff and rotate cushions periodically**

Firmness Levels:

- \*Plush Soft (2.55 Density - 16 lbs. Compression/ILD)
- Plush Medium (2.05 Density - 21 lbs. Compression/ILD) available at no charge

\*Denotes the standard cushion for Plush cushions

Back Cushion Choices

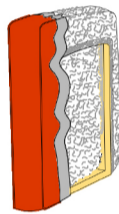

\*Fiber Back

Temple's Fiber back is our standard back insert. The channels of the back insert are blown full with premium Denured Fiber that provides a comfortable but yet supportive back system. Channels are used so the fiber fill does not settle to the bottom of the back.

**Care -- Rotate (if loose back) and regulate periodically**

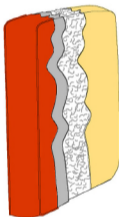

\*Denotes the standard back cushion

Flex Back

Temple's Flex back is constructed with a soft premium foam frame that is filled and wrapped with multiple layers of bonded fiber designed to "flex back" to its unique shape and crown. The Flex back is designed to provide a moderately soft back system that maintains its original shape and appearance long term. The flex back does set firmer than the standard fiber back and is a great option for commercial and high volume environments.

**Care -- Rotate (if loose back) and regulate periodically**

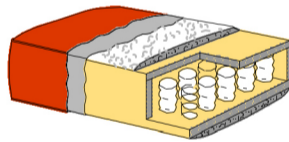

Foam Back

Temple's Foam backs are made up of a predominantly foam core that is covered by dacron all encased in a ticking to provide a "Very Firm" supportive and taut looking back. This type of back is often used in commercial and assisted living environments.

**Care -- Rotate (if loose back) and regulate periodically**

Specialty Cushion Choices

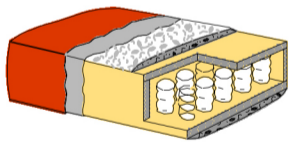

Spring Fiber

The center of this core is a Marshall unit of individually wrapped 13.5 gauge coils. The springs are encased in Qualux High Resiliency foam. The core is topped by Dacron polyester fibers and wrapped in a down proof fabric ticking. This seat offers comfort and softness, yet the springs help to maintain the cushion's shape and crown. Cushions will puddle.

**Care -- Fluff and rotate cushions periodically**

Firmness Levels:

- (2.55 Density - 27 lbs. Compression/ILD)

Spring Down

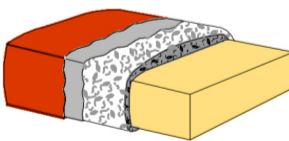

This cushion is similar to the Spring fiber seats, but we add a blend of feathers and down to the fiber wrap. Blend-down is made from a mix of approximately 75% Dacron fiber, 22% feathers and 3% down. This offers an extremely plush, rich feel often sought by designers. With blend-down, you should expect some maintenance. Cushions will puddle. Occasional feathers will appear. This means the cover is doing its job, breathing, which ensures your comfort.

**Also Available: Spring Down Package** This combines the comfort of Spring Down seats with down-blend back cushions. Backs will be filled with the same blend mix as the Spring Down cushions. They are enclosed in down proof ticking creating a great feel for the seats and the backs. Any toss pillows included with the style selected will be filled with a mix of 90% feathers and 10% down. Occasional feathers will appear. This means the cover is doing its job, breathing, which ensures your comfort.

**Care -- Fluff and rotate cushions periodically**

Firmness Levels:

- (2.55 Density - 27 lbs. Compression/ILD)

Signature Package

Signature is a package of down-blend seats, backs and toss pillows. This is a value package to achieve a soft, plush feel at a great price. The Qualux core has a rich down blend wrap, and is enclosed in a down-proof ticking. The backs use a blend-down fill, and any toss pillows are filled with a mix of 90% feathers and 10% down. With blend-down, expect maintenance. Cushions will puddle. Occasional feathers will appear. This means the cover is doing its job, breathing, which ensures your comfort.

**Care -- Fluff and rotate cushions periodically**

Firmness Levels:

- (2.55 Density - 27 lbs. Compression/ILD)

Luxe Premium Package

Temple's Luxe Premium is a package for our Generation You collection that consists of seats, backs and throw pillows. The Luxe Premium cushion contains a 4" thick, high modulus, high resiliency core, which is capped on the top and bottom with a 2" thick VX 3010 memory foam layer, the same foam used for comfort layers in mattresses. The top, front and bottom of the cushion is then wrapped with a continuous layer of ½" thick dacron fiber, all encased in fabric ticking. This cushion consists of state-of-the-art materials and engineering that provide the comfort of a very soft cushion, but also the resiliency and taut appearance of a firmer cushion. These two attributes create a cushion that is ultra-soft, but still has the bounce back, which offers slow acceleration upon sitting and prevents strong puddling. The sheer weight of this cushion confirms its overall quality.

The Luxe Premium backs and throw pillows are definitely not inferior to the Luxe Premium cushion that they are packaged with in our Generation You collection. The back inserts and throw pillow inserts are filled with microfiber which is less than one Denier in measurement. This microfiber fill is encased in a beautiful natural white down proof ticking with surged seams. This filling provides a luxurious, heavier feel to the backs and throw pillows. Our Luxe Premium backs and throw pillows have the feel of our Signature package, but without the feathers.

The combination of Temple's Luxe Premium cushions, backs and throw pillows is certainly a marriage that was long overdue!

**Care -- Rotate cushions periodically**

Firmness Levels:

- (Core: 2.30 Density - 24 lbs. Compression/ILD)
- (Cap 3.00 Density - 10 lbs. Compression/ILD)

\*\*\*Luxe Premium SEAT and BACK cushions available ONLY in Generation You Collection\*\*\*

\*\*See under each style in price list for which seat cushion (Comfort or Plush) is standard for that piece.\*\*

Compression / Indentation Load Deflection (ILD) is the pounds of pressure it take to indent the cushion.
